

**ENDOPARAZIN**  
**Blend of essential oils**

Article number: F0070

**Contains:** Thyme oil, cypress oil, juniper oil, clove oil, sage oil, garlic oil

Endoparazin is a blend of essential oils known with their effects on external (surface) and internal parasites. The contained oils are not popular with pinworms, tapeworms, roundworms and many other intestinal worms. The efficacy of these oils was proven for supporting the immune system and the body detoxication.

**Dosage:** The product is used in the form of drops added to the food or in capsules – 1 drop to 7 kg of animal weight once a day for 7 – 10 days. The contained oils help to repel parasites such as tapeworms, roundworms and pinworms. The treatment can be repeated when necessary depending on the actual occurrence of parasites.

**Veterinary's advice:** Many essential oils show efficacy against internal parasites, which has been used when creating the formula of this product.

**INCI:** Thymus vulgaris Oil, Thuja occidentalis Leaf Oil, Juniperus communis Fruit Oil, Eugenia caryophyllus Flower Oil, Salvia officinalis Oil, Allium sativum Bulb Oil

**Storage:** The stated durability of the product can be considerably longer if the product is kept in a dark and cool place (best in the fridge in the temperature around 6-10 °C).

Best before date on the packaging. Batch number and volume on the packaging.

**Distribution:** Aromaterapie Fauna s. r. o. / Barákova 675 / CZ-53803 Heřmanův Městec
